Dear Gamer,

Wargaming is on the rise! We are happy to report that without a doubt, wargaming is America's fastest growing hobby. From a hobby that started being played in back rooms so that neighbors couldn't observe a grown man playing with "toy soldiers", it has grown in status to the extent of almost being considered a science by some. We hope that in some small manner we have contributed to the growth of the hobby and will continue to do so in the future. It is our goal to provide the widest of selections for you to choose from and the service on orders the hobby should have had long ago. The hobby has long suffered from the amateur businessman and the hobbieist suffered in turn. Wargaming is our business and our only business! While we cannot promise that we will be able to fill every figure on every order due to the tremendous number of figures we carry (over 2,500 at last count) and the difficulty of transit from England, we do promise you good service. If your order has not been mailed by us within 48 hours of our receiving it, you will automatically be entitled to a 10% discount on your next order. It's going to cost us money if we don't give you good service!

This catalogue represents a new concept for us. You will notice that each brand of figures has been assigned a series of numbers by tens. As new releases are available, the next page in the series will be printed and automatically mailed to you. You merely slip them in the correct place and you are assured that you will always have a catalog of the latest figures on the market. No more having to replace your old catalogue every few months. In addition we are offering a selection of books for the wargamer. We will constantly be searching for new ones that might be of interest to the gaming community.

Good service, the widest selection of figures available in the United States, a business run by professionals, and personal attention to every order or inquiry. This is what we offer. With your continued support, together we will elevate the hobby to the level of acceptance it has long deserved. Do not hesitate to contact us if we can ever be of personal service. Good gaming!

DECADENT, SCHEMING ROMAN

or, if you prefer, Treacherous Vandal, Greedy Goth, or Blood-thirsty Hun. Any one of these parts may be yours when you play *Decline and Fall*, the game of the Barbarian Invasions. All you need are three friends (?) who are willing to take the other characters, and you are away with this attempt to save the Roman Empire.

Armies move across Europe, the hard pressed garrisons on the Danube and Rhine try to stem the flood, while the Hun moves in from the steppes threatening Germans and Romans impartially.

Threats, bribes, alliances made and broken, and all manner of diplomatic ploys follow in quick succession for 75 years of scale time until the final tally — has the Roman retained enough of his Cities to win? Or have the Germans managed to spread over sufficient land in the former Empire? What is the Hun's final head count?

Join those who have already become hooked on this most challenging and hilarious of games. The first of what will be a range of "different" games from —

All the figures on this page have been designed from the excellent Book

ARMIES OF THE MACEDONIAN AND PUNIC WARS written by Phillip Barker. This Book is available from us

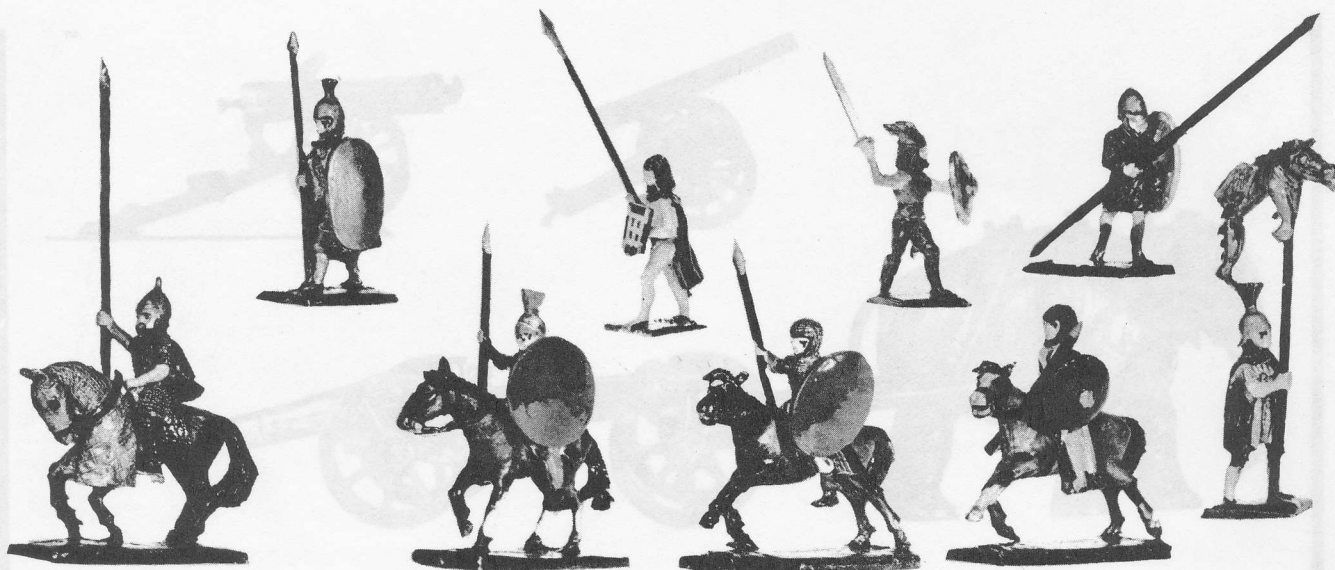

Phillip Barker who is the Secretary of the Society of Ancients, is an acknowledged expert in this period of history. His research in conjunction with his Wife Sue, is long, thorough and detailed so we have no hesitation in accepting the authenticity of all the information contained in the Book. Without this Book and regular visits to the Design Department by "The Barkers" this Company could not produce such accurate figures.

We would point out that as figures appear in the PB Range so the corresponding figures in the Ancient Range elsewhere in this Catalogue will be phased out in favour of the more accurate designs.

BOOKS BY DONALD F. FEATHERSTONE

WARGAME CAMPAIGNS

Caters to the experienced wargamer who is seeking larger scale battles and campaigns, but is not too advanced for the relative beginner, who will find much to improve and embellish his table-top battles. Excellent photographs and diagrams illustrate the book, and for the fast increasing number of war games club members, this book is essential reading. \$7.95

AIR WARGAMES

The aerial duels fought over the trenches of the Western Front in World War One possess a gallant and chivalrous appeal. Later the courageous "few", immortalised by Sir Winston Churchill, brought glory to the Spitfire and the Hurricane. The Japanese Empire was aided in its fall by the sea battles of Midway and the Coral Sea, both won through American air-power. All these, and many other facets of war in the air, can be reproduced, literally on the table-top, by means of the methods and rules contained in this book. \$6.95

WARGAMES THROUGH THE AGES

After many years of research, Donald Featherstone has finally provided, under one cover, all the information that a wargamer requires to build up armies adequately in the Ancient and Mediaeval periods. Each period is considered and details given of the soldiers themselves, their dress, arms and equipment, leaders, tactics and their style of fighting. Superb drawings of the soldiers in their various battle uniforms add much to the attractiveness of this book. \$7.95

NAVAL WARGAMES

Gives opportunity for tactical manoeuvres with ships of all types and periods, ranging from the Ancient Greek and Roman up to the mighty aircraft carrier of today. \$6.95

ADVANCED WARGAMES

Brings the advantages of the computer to wargaming. \$7.95

WARGAMES

A very good introduction to wargaming by the "Father of Wargaming himself". Should be in every wargamers library and is of interest to all. \$6.95

OTHER BOOKS

THE WARGAME - edited by PETER YOUNG

Ten great battles of world history are recreated in this unique book, by eight expert military historians. Illustrated with specially commissioned full-color photographs of realistic military miniatures re-enacting each battle, the book is both an impressive and fascinating study of the art of war, and a guide for wargame enthusiasts in setting up their own battle tables. \$10.00

UNIFORMS OF THE CIVIL WAR - by FRANCIS A. LORD and ARTHUR WISE

Probably the best book ever written to date on American Civil War uniforms. Contains a very large number of period photographs to illustrate the various uniforms and cannot be too highly recommended. \$10.00

THE CONFEDERATES AND FEDERAL AT WAR - by COL. H.C.B. ROGERS

Covers uniforms, arms and equipment, tactics, signal communications, methods of supply, movement by rail and road, medical services, recruitment and morale, and the organization of command and staff. A great deal of very practical information for the wargamer. \$9.95

NAPOLEON'S MARSHALS - by Peter Young

A new and fantastic book from Brig. Young. Contains sixteen superb color plates to illustrate the variety of uniforms worn by the marshals and their staffs. Among the forty black-and-white pictures is an authentic portrait of every marshal. Has received very good reviews at all levels. Well worth the price. \$12.50

WATERLOO UNIFORMS, BRITISH CAVALRY - by JOHN MOLLO

In 1815 there were no written dress regulations; but in this book, the first of a series, contemporary orders and inspection reports, references found in contemporary newspapers, letters and diaries and information gleaned from paintings, drawings and prints, have been assembled and arranged in the format used in later dress regulations. The reader may now see, at a glance, the stage which modern scholarship on the subject has reached. In addition to the regimental sections, there are others on weapons and equipment, as well as some basic information on cavalry formations and movements - information difficult to obtain in a compact form when required. Numerous illustrations of items from public and private sources, many previously unpublished, support the text, whose findings are summarized in a series of colored schamae of those regiments present during the campaign, arranged in their respective brigades. Without a doubt the finest uniform book we have ever seen on any period. Belongs in every library and has our very highest recommendation. \$13.50

THE CAMPAIGNS OF NAPOLEON - by DAVID CHANDLER

Long considered the Bible for historians and wargamers of the Napoleonic period. Now out of print, we have a limited supply on hand for those of you not lucky enough to have a copy in your library. A book worth the price at any amount. Ask someone that owns a copy. \$19.95
